

Dmytro Stoianov

Software Engineer

✉ dmytrostoianov05@gmail.com | ☎ +31 622 97 4721 | 📍 Amsterdam, The Netherlands | 🌐 [dmytrostoianov](#)

Summary

A young and motivated Software Engineer with 4 years of proven hands-on experience. Mainly specializing in web and mobile development with JavaScript/Typescript. Experienced in fast-paced startup environments - comfortable taking ownership, moving and adapting quickly. Allergic to unclean code and bad practices.

Skills

JavaScript

TypeScript, React.js, React Native, Node.js, Deno, Express.js, Jest, Cypress, Playwright, Vitest, Vite, Webpack

Databases

SQL, SQLite, MySQL, PostgreSQL, Redis, MongoDB

DevOps

CI/CD, Docker, Nginx, PM2, GCP, Git, Github Actions

Other

REST, GraphQL, Websockets, Webhooks, RabbitMQ

Experience

Neno

Amsterdam, The Netherlands

Software Engineer

Feb 2026 - Present

Part of a strong engineering team at an early-stage AI financial services company, with teammates bringing experience from companies such as Booking.com, Mollie, and Adyen. Joined Neno at an early stage and grew alongside the company and the team, taking broad ownership across frontend and backend development. Primarily focused on frontend development across the main Neno app, commercial website [neno.co](#), and internal platform for accounting and sales teams. Led the redesign of the core application, built a reusable design system and component library with Storybook documentation. Led the full-stack implementation of integrating Open Banking feature using Yapily's API, working closely with their integration engineer throughout the integration. Took full ownership on building and releasing the Neno mobile app with React Native for both iOS and Android.

Chapter

Amsterdam, The Netherlands

Software Engineer

Feb 2025 - Feb 2026

Was part of a development team at a sustainable energy startup. Developing AI-powered web application. Being responsible for both frontend and backend development. Architected and implemented the frontend application from scratch supporting mobile and web platforms in one codebase. Successfully transitioned a core Node.js service from GraphQL to REST, simplifying the architecture and improving maintainability across the company's systems.

Sowieso Digital

Halfweg, The Netherlands

Software Engineer

Sep 2023 - Feb 2025

Worked as part of a development team at a digital agency, contributing delivery of pre-existing projects while also participating in development of from scratch solutions. Primarily built software for Vattenfall and its subsidiaries. Designed, implemented, and delivered from scratch both - a customer conversion web application and a dashboard web application for Powerpeers, an energy provider with 50,000+ customers. Successfully shipped mobile applications to Google Play and the Apple App Store, managing the full lifecycle from development through deployment.

EPAM Systems

Remote, Ukraine

Software Engineer

Oct 2022 - Sep 2023

Worked in one of development teams for an IT consulting company, building and maintaining single-page applications (SPAs) in React and web services in Node.js.

Education

Odesa National Polytechnic University

Bachelor

Computer Science

Odesa, Ukraine • Sep 2022 - Jun 2026

Languages

English, Ukrainian, Russian
